Battery Status Indicator

ONE LOOK

Introductory special
\$31.89

One look is all it takes to ensure your batteries have all the power they need. The Battery Status Indicator monitors the state of power for any battery, particularly liftgate batteries. If it flashes RED, charge the batteries before the trailer leaves the yard.

How it works:

- If the battery voltage is more than 12.4 volts (75% power), the LED will flash GREEN in 10 second intervals
- If the battery voltage is less than 12.39 volts (75% power), the LED will flash RED in 10 second intervals
- Indicator shuts off if liftgate has not been used for 2 hours

Part No.

AGM TECHNOLOGY

For Commercial, Automotive, Marine, or Off-Road Applications

FEATURES

- 100% maintenance-free
- Tightly "packed" AGM
- AGM design
- Faster recharge

BENEFITS

- Eliminates the need to check fluid levels & environmentally friendly
- Resistance to shock & vibration to extend battery life
- Eliminates acid spills, terminal corrosion & lowest internal resistance
- Quicker turnaround times

Dual Purpose Design
 Delivers starting & deep cycle power
